

DR. FLINN MAKES OFFER OF A TROPHY

Takes Most Commendable Attitude For Advancement of Physical Develop- ment in Arizona Schools.

(From Saturday's Daily)
(BY RAB.)

A new proposition which is certain to appeal to every school lad, not alone in Prescott but in this entire territory, has been advanced by Dr. J. W. Flinn, one of the leading physicians of this city.

Dr. Flinn proposes to donate a handsome trophy—several of them if desired—for the school making the best athletic showing in interscholastic contests. He is not in the least bit reserved in the number of cups or trophies. He is willing to buy several if the occasion demands. And he is actuated solely by a desire to stimulate athletic events in the various schools for he believes in the physical development together with the mental activities, that the student is better fortified to continue his studies in a manner that is beneficial to all.

"I don't know a great deal these days about athletics," said Dr. Flinn modestly yesterday, "but I still retain sufficient interest and am absolutely convinced that a trophy would stimulate the various schools to renewed activity in athletics and none will deny that athletics are good for the pupils for it makes them strong in muscle and body and thereby aids them in every way. It is well known that a hardy, sturdy student can do more mental work than one who is weakly and sickly most of the time. By judicious athletic exercise many a lad and lassie who has been none too strong has become healthy and hardy and prepared from a physical standpoint at least to fight the battles of life.

"It is possible that a territorial tournament might be out of question. The expense might be heavier than the gate receipts.

"However, it seems to me that Prescott, Williams, Flagstaff and Phoenix might be able to arrange for a tournament in which the schools of these various cities have teams entered.

"But if this should prove impossible, why not have local events. My offer of a trophy or trophies will still hold good. I hope that the principals of the schools will take this matter under serious consideration."

And the consensus of opinion will be that Dr. Flinn is right. Too much study without proper athletic exercise just like too much work without any play makes not only Jack, but also Jessie, a dull boy or a dull girl, as the athletics in moderation unquestionably strengthen the mental faculties and allow the pupils to do additional work and to do it better than if they were to become confirmed bookworms.

And Dr. Flinn has not overlooked the girls. He is willing to offer a trophy or more than one for that mat-

ter for mild exercises in which they can display their skill, such as tennis or basket ball.

The matter is now up to the various school chiefs. Dr. Flinn has most generously offered to do his part. What will the school chiefs of the various towns do?

It seems a certainty that if they investigate the matter fully they will find it helpful in every way and furthermore assurances can be given that the gate receipts from the various contests will more than compensate for the expenses that will be involved.

PREDICTION MADE
REGARDING COPPER

BOSTON, Mass., Nov. 4.—The copper selling agencies which have ventured an estimate concerning the forthcoming statement of the Copper Producers' association state that they are confident there will be a reduction in stocks during the month of October. The United Metals Selling company adheres to its normal quotation of 13 1/4, but electro is obtainable in large quantities elsewhere at 12 1/2 to 13 cents and the natural assumption is that the United Metals Selling company is getting only the "overflow." The smaller Lake Superior companies are taking business at 13 cents to 13 1/8 for lake grades. The Stanton interests in the past few weeks have sold between three and four million pounds at 13 1/4 cents.

When the 25 cent dividend just declared on Butte Coalition shares is made payable December next, two years will have elapsed since the previous disbursement. Up to December, 1907, when 15 cents per share was paid, the company had disbursed since its organization in 1906, 2,450,000 in dividends on its 1,000,000 shares. Butte Coalition is producing very close to 40,000,000 pounds of copper per annum at a cost of 10 cents per pound. On 13-cent copper the indicated profits are equal to \$1.20 per share as against current dividend requirements of \$1 per share per annum. On December 31 next the company will conclude the best year in its history and will show a record production as well as the lowest costs. Through the opening of the new Tramway shaft a much larger ore tonnage has been available while a large portion of dead work formerly charged up to the cost of operation has been completed. Butte Coalition has a cash surplus approximating \$4,000,000 and this has been kept virtually intact since organization.

Mr. Dazie may play the principal role in a dramatization of "The House With No Address." The story is based upon an incident similar to one which actually happened in the dancer's life.

STRANGERS GIVE BOND FOR SELIGMAN PARTIES

Mrs. Wiles and D. D. Rogers Gain Release—Unfortunate Woman Sues For Divorce.

(From Saturday's Daily.)

Two important developments took place yesterday in the cases of Anna M. Wiles and D. D. Rogers, who were arrested on a charge of violating the Edmunds act.

One was the filing of suit for divorce by Mrs. Wiles from her husband, Chas. M. Wiles.

The other was the release on bonds of Mrs. Wiles and Rogers. The former's bond was fixed at \$100 and the latter's at \$500.

A remarkable feature of this case, which is now attracting wide attention owing to its sad features and the fact that two innocent babies are involved in the affair, is that two total strangers to the parties—John Kinney, a well-known mining man, and Dr. Warren E. Day, a prominent physician—voluntarily out of sympathy after hearing their stories furnished the bond which gained for

the prisoners temporary freedom. There were other tenders of assistance but they were declined with thanks.

Through her attorney, Henry P. Ashurst, Mrs. Wiles in her divorce petition filed yesterday alleged that for two years Wiles has failed to support her and that "at all times during the past two years plaintiff has wholly by her own labor and work and the bounty of friends and acquaintances, earned a living and support for herself."

Personal service was had yesterday on Wiles, who is at present in this city.

Willis R. Munger, a wealthy broker of St. Joseph, Mo., and brother of Mrs. Wiles, arrived here last evening. He declared that he will stick by his sister to the end and do everything in his power to aid her.

FAILURES TO FIND NEW MINING CAMPS

More Railroads Needed For Those Already Established

(From Saturday's Daily.)

That part of the public which is interested in mining has been disappointed in some essential particulars, to begin with, the expectation that at least one new mining camp would be discovered at some point along the Moffat railroad. It has not materialized. While it is true that some discoveries have occurred, there is nothing in the present aspect of affairs to warrant the conclusion that a new belt of mines, having the features that attract multitudes of people and result in large production of rich mineral, has been found. One prospector found a strong vein of copper in Elk park, Routt county, and another a ledge or deposit of fair average value, 75 feet wide, in the Rabbit Ear range of Grand county, but neither of these disclosures attracted much attention. Therefore, unless finds have been made elsewhere and strict secrecy maintained, nothing new in the way of additions to our already extensive mining area has come out of the past summer's work.

It is not essential to the prosperity or the perpetuity of the mining industry of Colorado that new fields should be discovered. We possess already an enormous area of as good mining ground as can be found in the world, not in one place, but in many places. When the prospectors of the Leadville period found extensive belts of mineral veins they proceeded to open them with such means as they could command. This work resulted in the exposure of great treasure, but the discoverers were handicapped by their remoteness from railroads. They had the ore of unquestionable value and of large extent, but they were unable to get it to the markets without heavy cost, which absorbed profits. As a consequence, little beyond surface exploitation was accomplished.

We know that many points in Gunnison, Summit, Gilpin, Clear Creek, Park, Lake, San Juan and La Plata counties are as good mining sections as exist in any portion of the west, yet they have made no impression upon the market because little has been produced and for the reason stated. They are held back by the lack of rapid transit, and will be held back so long as this prerequisite to progress is withheld.

Our smelters are in need of ore to fill their furnaces, many of which have been out of commission for a long time. Yet there is plenty of ore. It seems to be a question that only the owners of our several rail-

way systems can settle, and that they do not appreciate the necessity is shown by their disinclination to act.

There is a great traffic in these isolated camps awaiting the arrival of locomotives and freight cars. It is sufficient to pay for building the spurs that are needed. Yet the cry is almost constant, "We need new mining camps." What we actually need is a little railway building. There are camps enough to supply the demand for more mining activity, but the products are not good for much without a market. Given the facilities to reach the market, there would be a great influx of ore.

We may in time be startled by some great discovery of mineral in an out-of-the-way place in the mountains of Grand or Routt, but what is needed now are ways to reach a dozen or so camps that can be made largely productive within a month after tracks and cars are provided. They have been prospected and we know something at least of what they contain. There's millions in them. We need some one to go after the millions with steel rails and locomotives.—General Frank Hall in the Denver Post.

GREENE COMPANY ASSETS ARE ACQUIRED

The United States Investor in its issue of October 23 gives the latest phase of Colonel W. C. Greene's ill-fated and long bankrupt \$25,000,000 gold concern, the Greene Gold-Silver company, which was advertised up to two years ago as owning 116 mines, a smelter concession at Guaymas, Sonora, etc. The investor, in the issue mentioned, contained the following advertisement:

"To the stockholders of the Greene Gold-Silver company:

"The Humboldt Exploration company, 50 Church street, New York, having purchased all of the assets of the Greene Gold-Silver company, sold at the sale of the trustee in bankruptcy under the direction of the United States district court for the southern district of West Virginia on the 4th inst. which sale was on the same day confirmed by the court.

"All stockholders of the Greene Gold-Silver company can have, by application in person or by writing, terms of exchange of their stock for stock of the Humboldt Exploration company."

The above notice is a sort of sequel to news long since published. The Humboldt Exploration company is a corporation at the head of which is General Henry I. Willey of New York formerly a mining engineer of Colonel Greene. General Willey has been working for a long time to get hold of the Greene Gold-Silver company. It appears from the above advertisement that his company has bought the assets of the Greene Gold-Silver company of the United States but the question naturally arises as to how General Willey's company will get hold of the assets of the Mexican holding company which Col. Greene had to hold all those 116 mines, etc.

CATTLE MARKET.

CHICAGO, Nov. 5.—Cattle, receipts 2,000; westerns \$3.90 to \$9.10. Hogs, receipts 14,000; mixed \$7.35 to \$7.90.

JUANITA PEOPLE PLAN INCREASED OPERATIONS

New Stamp Mill For Property And Three Shifts Are to be Put at Work.

(From Saturday's Daily.)

After four years of practical and extensive development, the Juanita Mining and Milling company make the announcement that beginning on the first of December general mine work with three shifts will be inaugurated. Arrangements are to be immediately made for the placing of a new and improved 20-stamp mill on the property.

O. A. Seaman, one of the principal stockholders of the enterprise, left yesterday for St. Louis, where a general meeting of the principal stockholders is scheduled to take place to consider various matters. The decision to extensively operate the ground follows the showing made by systematic working.

The location of the new mill will be on the dump of the Tom Dick claim and conservative estimates of

the ore available for treatment give 20,000 tons as the minimum. This does not include what may follow in development, and the plan of the company is to have the mill running early next spring. By that time an additional tonnage will be given.

It is expected to keep the mill running continuously.

The Juanita people have a group of fourteen mines under ownership, situated in Crook Canyon and adjoining the Bodie mines. The ores carry values in gold, silver and copper, the yellow metal predominating.

C. E. Warren, who has been the superintendent of the company from the beginning, will continue in that capacity under the new arrangement. He is a competent miner and conversant with the ground at all points, possessing a practical education in mining work.

YUMA COUNTY NOW COMING TO FRONT

Properties Are Being De- veloped on An Ex- tensive Scale

YUMA, Ariz., Nov. 5.—The next six weeks will see no little development work among the mining claims of Yuma county, which, up to the present time, have been scarcely more than prospects. The fine showing made recently by the Crackerjack property, in the Castle Dome district, has inspired the owners of the Cave group, consisting of claims 1, 2, 3 and 4, to commence active operations, and a force of miners will soon be on the ground. The Cave group is owned by seven parties, including Max Czuczka, James R. Kilgore, Harry Brownstetter, C. H. Olney, L. M. Etheridge and P. J. Hammer of Los Angeles. Kilgore is also one of the owners of the Crackerjack, which, by well informed mining men, is rated as one of the most promising of the undeveloped mines of Yuma county.

The Mexican Girl, consisting of seven claims, adjoining the Hecla group, near Walton, will also be the scene of active development work in the near future. It is a free milling gold proposition and in the center of what is possibly the second richest mineral district of the country. Rock from the Mexican Girl has assayed at astonishing figures, and the owners, A. H. Kent, Henry Morris and Max Czuczka all of Yuma, have unlimited confidence in the mine's future. Thirty feet of work has already been accomplished and drifting started.

At the Thumb Butte the main shaft is now down 350 feet, the ore all the way showing well, carrying an average value of \$17 per ton. Seven men are employed at the present time and this force will shortly be increased. During the three months of July, August and September, when, owing to the heat, work was not practicable, water accumulated in the shaft, which had to be drawn off before the developing work could proceed. Secretary Ming of the Thumb Butte company, who has recently returned from a thorough inspection of the property, reports that the company will install a mill within the next few months. A new bunk house and commissary have been erected to take the place of the buildings destroyed by fire in the early summer. Charles Theobald is superintendent of the mine.

S. T. Bentley will resume operations on his property consisting of six claims in the La Paz mining district of Yuma county, 12 miles west of Quartzite. The tunnel now in 160 feet will be extended 100 feet further on the Chuckawalla vein, the tunnel now being at a depth of about

200 feet from the apex. An equipment of rails and ore cars will be purchased this week and a shift of men put to work immediately. The values on this property consist of free milling quartz, which roughly averages \$15 per ton in gold. Sufficient capital has been interested to thoroughly explore this property.

The Yuma Copper company of which Samuel Harrell, affiliated with the Standard properties in Michigan, is president, has until September, 1910, to complete cash payments upon its property in Arizona.

PUBLIC RECORDS.

Instruments Filed as Reported by The Prescott Title Co.

Mrs. Carrie Thorbecke to Tranquillino Morales, Q. C. deed; September 11, 1909; \$250; Lot 8, Block 14, Jerome; Chas. T. Lynch.

Wm. Baird locates Fair View Mine, Hesse Dist.; August 18, 1909.

Anton Schneider files affidavit assessment work on two mines, Walnut Grove District.

B. W. Barr and M. H. Lyon locate one mine, Eureka District; September 11, 1909.

Fred Mickle to George Avery, bill of sale; October 15, 1909; \$1050; various cows, calves, poultry, crops, wood, etc.; R. A. Smith.

Fred Mickle to Geo. W. Avery, lease; October 15, 1909; 10 years; \$5000; Fred Mickle Ranch of 80 acres; Carl M. Heim.

Chas. D. Willard to Geo. W. Avery, lease; October 15, 1909; 10 years; \$6000; Old Dwyer Ranch of 120 acres; Carl M. Heim.

D. F. Stoner files affidavit assessment work on Oronoga and Enretta mines, Weaver District.

F. P. Lewis locates Blue Bell mine, Tip Top District; September 7, 1909.

A. Starkweather to Kay Copper Co., M. Deed; October 19, 1909; \$10; Southwest Extension, Southwest Extension, Zola and Zilla Mines.

John L. C. McLaughlin files affidavit assessment work on Weaver Pass Yarnell Placer Mine, Weaver District.

Robert E. Morrison and Allen Hill incorporate International Development Company, capital stock \$3,000,000; October 29, 1909; J. E. Russell.

United States to Copper Queen Gold Mining Company, patent; September 9, 1909; HoneyMoon and Kid Mines, Agua Fria District.

October 30.

tie Crain, W. D., lot 95, block "E," Syndicate addition, Jerome.

Julius E. Brandt locates High Tide mine, Pine Grove district.

J. D. Winingham locates Tom Boy No. 1 placer, Big Bug district.

Hillside Consolidated Mining company amends articles of incorporation.

F. M. Murphy locates Florida mine, Pine Grove district.

J. G. Quintanilla and wife to R. A. Smith, W. D., lot 102, block "E," Syndicate addition, Jerome.

Yavapai Mercantile company to Walter Hill, trustee, bill of sale, stock of merchandise and all property at Humboldt.

B. P. and R. Morales locate Virginia mine, Weaver district.

Estate of David Grubb files affidavit of assessment work on Porphyry mine, Hass district.

Why Suffer?

Are you one of the thousands of women who suffer from female ailments? If so, don't be discouraged, go to your druggist and get a bottle of Wine of Cardui. On the wrapper are full directions for use.

During the last half century, Cardui has been established in thousands of homes, as a safe remedy for pain which only women endure. It is reliable, contains no harmful ingredients and can be depended on in almost any case.

Take CARDUI

It Will Help You

Mrs. Charles Bragg, of Sweetser, Ind., tried Cardui. She writes: "Tongue cannot tell how much Cardui has done for me. Before I began taking Cardui I could not do a day's work. I would work awhile and lie down. I shall always give praise to your medicine." Try Cardui.
